PDAL

JAQ3

## launches two new Windows Mobile® Pocket PC phones

i-mate<sup>TM</sup> JAQ3 and PDAL make their debut

Infinity technologies the official distributor for Imate Pocket PCs & Smart Phones also for Infinity Xseries and Desktop PCs the specialist in Windows Mobile® devices and solutions, is now further extending its product portfolio with the launch of two new products to continue satisfying the needs and preferences of its thriving customer base. In line with the strategy of offering more mid-range Windows Mobile® devices that appeal to a wider audience, the JAQ3 and PDAL both deliver the many familiar applications of Microsoft® Windows Mobile® 5.0 for Pocket PC at a lower price point.

Commenting on the launch Robin Bowler Global Marketing Director at i-mate<sup>TM</sup> said:

"Both the i-mate<sup>TM</sup> JAQ3 and PDAL will appeal to anyone who uses a Microsoft® based PC at home or work, and who want to work and play on the move. Their familiar

Windows Mobile®-based user interface is intuitively simple and integrates seamlessly with the Windows® PC oper-

ating system. Add to that the range of functionality options, the highly competitive pricing, and i-mate<sup>TM</sup>'s comprehensive range of value added services and support, and you've got a very compelling proposition for professionals and consumers alike."

Both devices boast GPRS, EDGE and high-speed Wi-fi connectivity for excellent data download rates and a truly satisfying push email experience, that extends to attachments for opening and real-time working.

This duo of devices has been designed with user preferences in mind, and as a pair,

offer the fundamental choice of a messaging form factor, or a classic PDA-style device.

The i-mate<sup>TM</sup> JAQ3 has a full QWERTY keyboard, five direction-control buttons and

scroll wheel allow for easy navigation and use of services including email. Furthermore, the landscape 2.4" colored touch screen supports the use of the stylus as an

increasingly popular means of accessing and writing email and messages. This stylus

functionality is of course also

a key part of the PDAL, experience, as this is the latest

model in i-mate's classic PDA range. This stylish and compact device is one of the

lightest PDA's in the marketplace and also features a 5-way navigation pad. The PDAL

has the option of portrait or landscape orientation so applications can be viewed to the user's preference. Presented in a sleek black and silver casing, with stylishly curved

corners, the PDAL delivers a satisfying touch screen experience from its resilient and vibrant touch screen.

As with the other i-mate<sup>TM</sup> devices in the portfolio, these devices deliver the benefits of

Windows Mobile® 5.0 Pocket PC including Windows Mobile® Direct Push\* Email for

instant access to emails including attachments, MSN® Mobile including Hotmail® and

MSN® Messenger access, Microsoft® Office Mobile, Windows Media® Player Mobile 10

and Internet Explorer Mobile. Both JAQ3 and PDAL also boast a 2.0 Mega Pixel

camera/video as well as Club i-mate value added services.
